

CO 82 IMPROVEMENTS PROJECT GLENWOOD SPRINGS TO CARBONDALE

PROJECT SUMMARY

This project includes asphalt mill and overlay, guardrail replacement, utility work, ramp improvements and striping. Construction will occur on Colorado Highway 82 between 24th Street in Glenwood Springs and mile point 12, just past the main Carbondale exit. Crews will begin the project in Glenwood Springs and work towards Carbondale.

CDOT has prioritized this area for construction due to the condition of the roadway which has seen significant rutting, often resulting in standing water on the highway, and public input. This construction will provide and improved driving surface and help ensure the longevity and safety of our infrastructure.

Anticipated Timeline: May-October 2019

- May 13: Utility work begins
- Mid-May: Guardrail replacement and curb ramp replacement begins
- Late Summer: Milling and Paving

General Contractor: Grand River Construction

TRAVEL IMPACTS

Road Impacts

Travel impacts for motorists and trail users will vary throughout the project. For much of the guardrail replacement and the mill and overlay work in the driving lanes of the road, motorists should anticipate stretches of lane closures, reduced speed limits and narrowed roads during daylight hours. Delays are anticipated; please allow extra travel time through the area. Remember, go slow for the cone zone.

Lane Restriction Hours

In order to minimize impacts to the traveling public, there will be no lane closures during the morning peak for the eastbound/upvalley lanes (towards Aspen, 6-9 a.m.) or during the afternoon peak for the westbound/downvalley lanes (towards Glenwood Springs, 3-7 p.m.).

Trail Impacts

Crews will also be constructing improved pedestrian curb ramps at several intersections along the corridor including at 27th Street, Blake Avenue, Spring Valley Road and CO 133 (the main Carbondale exit). Rio Grande Trail users should anticipate some detours and intermittent holds. During work and non-work hours all trail users are asked to follow signage, flagger instruction and any detour routes for their own safety.
